Additional Information: Tim called to state the following: "My name is Ex. 6 - Personal Privacy I live in Saint Francis Ex. 6 - Personal Privacy of the barrel company in St Francis. I was told by City Hall to give you a call because you were tracking the issues of chemical smells at that barrel plant. I'm just calling to say right now there is a pretty strong and you can kind of taste it, when you breath it in now. I am pretty sure the heat has something to do with it. It is a pretty strong chemical small and it is kind of bothersome. I smelled it today on July 5. I've been noticing it most from twelve o'clock and on I've been smelling it strong. so I've been told to call you to leave a message. If you want to call me back to talk about it, feel free to call me back."						
Investigated On: 07/13/2017		Investigator(s): Mike Griffin		Report Below/Attached		

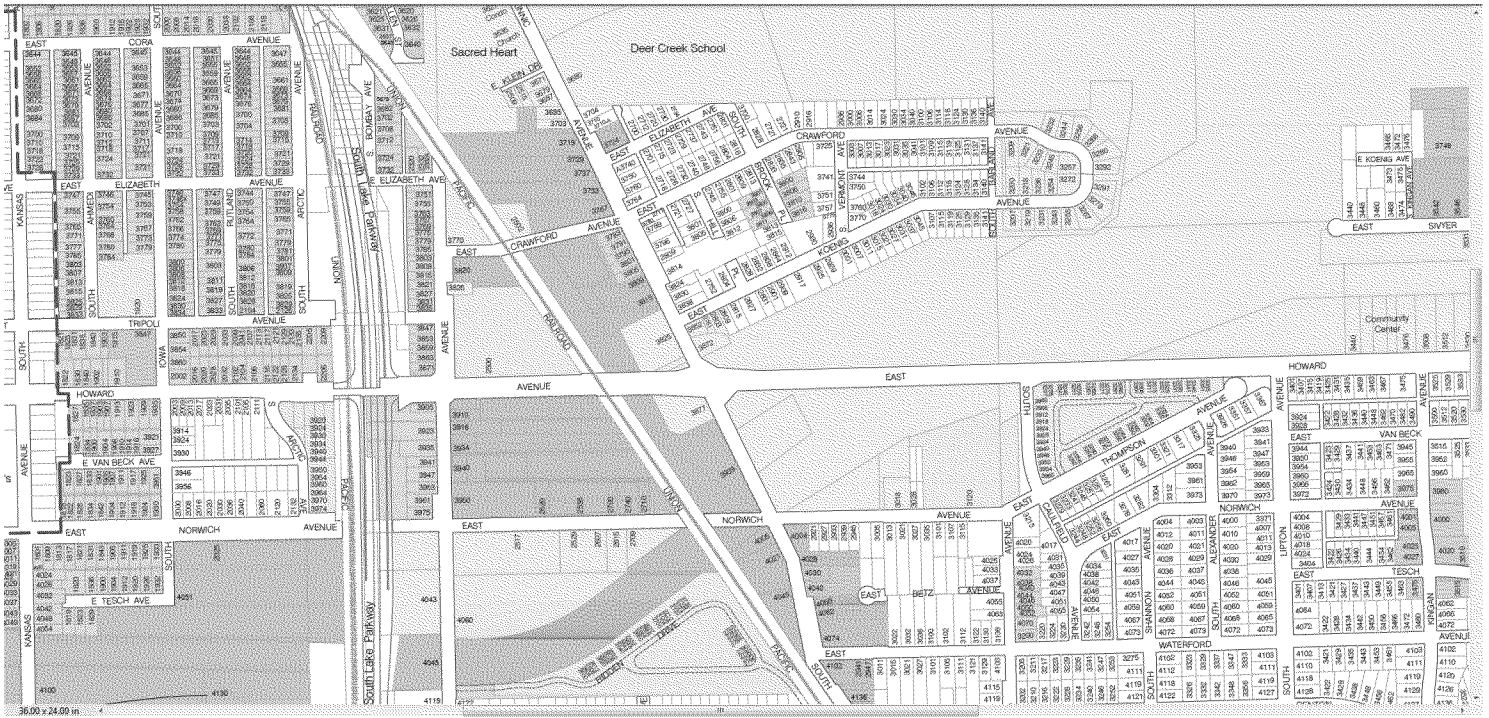

Remarks: I spoke with **Ex. 6 - Personal Privacy** 7/11/2017 **Ex. 6 - Personal Privacy** stated that the odor was of an intensity of 5, with 0 being non detectable and 10 being objectionable. **Ex. 6 - Personal Privacy** stated the odor was easily detectable but did not cause **Ex. 6 - Personal Privacy** to respond by taking evasive action. **Ex. 6 - Personal Privacy** did state that it cause a bit of tingling in **Ex. 6 - Personal Privacy** throat.

The weather data for July 5 shows winds from the east at 10 mph and 80 Deg F.

I surveyed the area at 2 pm on 7/13/2017. I observed blue smoke from the scrubber stack as well as the very long, tall and slender stack to the east. The opacity of the wet scrubber stack averaged 30 % opacity and was blue in color. I surveyed for odors and identified a wet wash and alcohol type component to the discharge. This was noted downwind of the facility. I drove around the area and noted no other contributing sources.
